Live-Online-Training, Berlin, Hamburg, München

## Verfügbare Kurstermine:

01.06. - 03.06.2026, 02.09. - 04.09.2026, 25.11. - 27.11.2026

## Kursbeschreibung

Kurssprache ist Deutsch, die Unterlagen sind in englischer Sprache (teilweise in digitaler Form). This course covers the deployment of the SnapCenter Software 4.0 release. In this course you learn how to install, monitor, and manage SnapCenter Server and SnapCenter Plug-ins. You learn how to install licenses, configure role-based access control (RBAC), and install the SnapCenter Plug-ins for Windows, Linux, and Oracle. You learn how to prepare hosts and connect to the NetApp ONTAP storage system. You also learn how to back up and restore Windows file system data and configure SnapMirror and SnapVault relationships for use with SnapCenter software. The course materials include a guide for hands-on exercises that you perform in a lab setting. Hinweis: Dieses Seminar führen wir in der Regel in Kooperation mit der Fast Lane GmbH durch.
